Summary

Product designer with 7+ years shipping consumer products at scale. At Snap, I lead design across six product verticals and define how AI shows up inside social communities. At Tinder, I architected a profile system that has since powered 50+ experiments and an attributed \$50 to 110M in revenue lift. I prototype in code alongside engineering partners to move ideas into production.

Work Experience

Snap Inc. · Staff Product Designer September 2024 - Present

Lead design across six product verticals (Camera, AR, Growth, Messaging, Games, Topic Chats), mentoring designers and pitching product strategy directly to the CEO weekly to shape company-wide bets.

In Topic Chats, public moderated communities for Snapchatters 18+, define how AI shows up as a community participant, not a chatbot. Designed live-event conversation, discovery, notifications, and sharing loops that scaled Topic Chats to **+71K incremental U.S. DAU, 40K peak concurrent users**, and **208K messages/week**. Prototype interactions in real code (Claude, Cursor, GitHub) to pressure-test patterns before handoff.

Pitched the bet, then scaled Snapchat Games from concept to a **30M+ DAU** platform (**+120%** Game Video Posts on iOS), and grew bi-directional Daily Chat/Snap relationships **+3.4%** through Messaging initiatives.

Tinder · Senior Product Designer September 2021 - September 2024

Architected Tappy Cloud, a backend-driven profile interaction framework powering Relationship Intent, tags, and downstream surfaces on iOS and Android. The internal tool (TaCo) has since powered **50+ experiments** and an attributed **\$50–110M** in revenue lift, including a **+20%** lift in Likes Sent.

Led the Discovery pod, shipping 0-to-1 community surfaces for LGBTQIA+ users and Festival Mode, a seasonal Tinder Explore experience that drove **2x** likes and conversations vs. the main swipe stack and a **+10%** lift in Explore tile opens.

Mapped a Hackathon-winning concept into Sparks, a globally shipped profile system of Prompts, Quizzes, and refreshed match interactions: **+0.9%** Likes Sent, **+0.8%** Subscription Cash, **+0.3%** Days Active.

Skills

AI & PROTOTYPING

- AI prototyping in code (Claude, Cursor, GitHub)
- Prompt design for AI features

INTERACTION DESIGN

- Wireframes, flows, mockups, hi-fi prototypes
- Design systems and component libraries
- Consumer mobile (iOS, Android) at 10M+ DAU scale

LEADERSHIP

- Cross-functional partnership with PM, Eng, Research
- Executive partnership

Whip Media · UX Designer

October 2019 - September 2021

Redesigned Custom Lists end-to-end in TV Time, driving **+14%** new users creating lists and **+15%** lists created in A/B testing.

Built a B2B SaaS design system from scratch to accelerate product velocity across the company.

Designed Whip Media Marketplace O-to-1, the content licensing platform serving NBCUniversal, Warner Brothers, and HBO.

Tangent Agency · Graphic & Motion Designer

June 2018 - March 2019

Produced multi-format visual storytelling (static, GIF, motion, out-of-home) for major film and television releases.

Led design on the Lego Movie 2 campaign, winning Platinum AVA and Silver Clio awards for social media and interactive marketing.
